Fisher Artwork Specifications for: Wall Padding, Wind Screens, Mats, Bags and Scorers Tables

Vector Artwork is Preferred

Non-vector art can have jagged edges. Files usually end in: .jpg, .tif, .doc, or .bmp

Vector art has smooth edges and is made up of points and lines. Files usually end in: .ai, .cdr or .eps

- Note that file extensions do not guarantee whether art is vector or bitmapped. Call Fisher if in doubt.

-
- Adobe Illustrator (file extension: .ai or .eps) or Corel Draw (file extension: .cdr) are accepted platforms for vector art.
 - Adobe Photoshop (file extension: psd, .tif or .eps) is the preferred platform for non-vector (bitmapped) art. Please be sure resolution is at least 300 dpi. Any resizing may incur additional charges.
 - High resolution photographs may be submitted for digitally printed wall panels. Low resolution internet photos do not produce acceptable results. Copyrighted photos must be legally purchased.
